

## Using Linux Help Resources

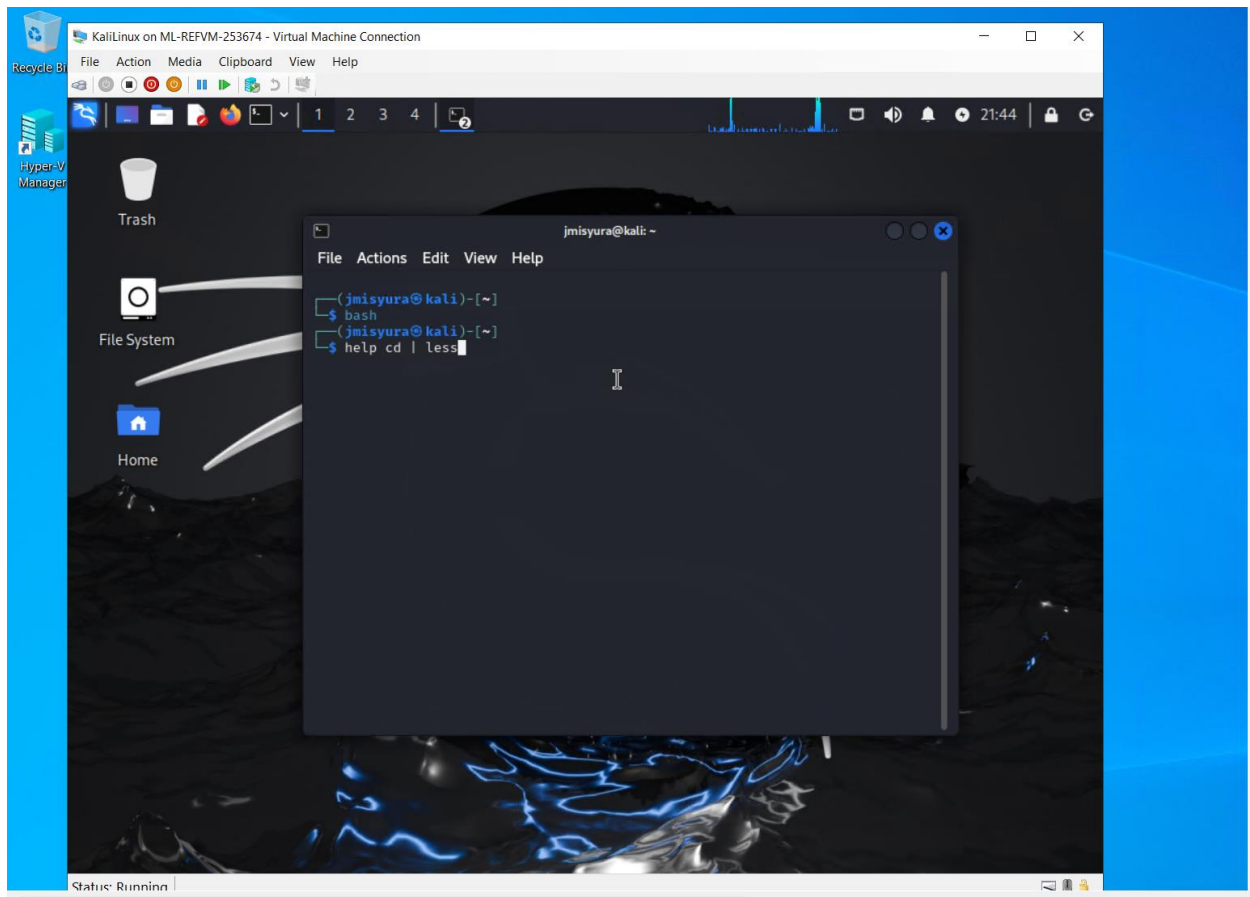

The screenshot of the command to get the manual page before you invoke it:

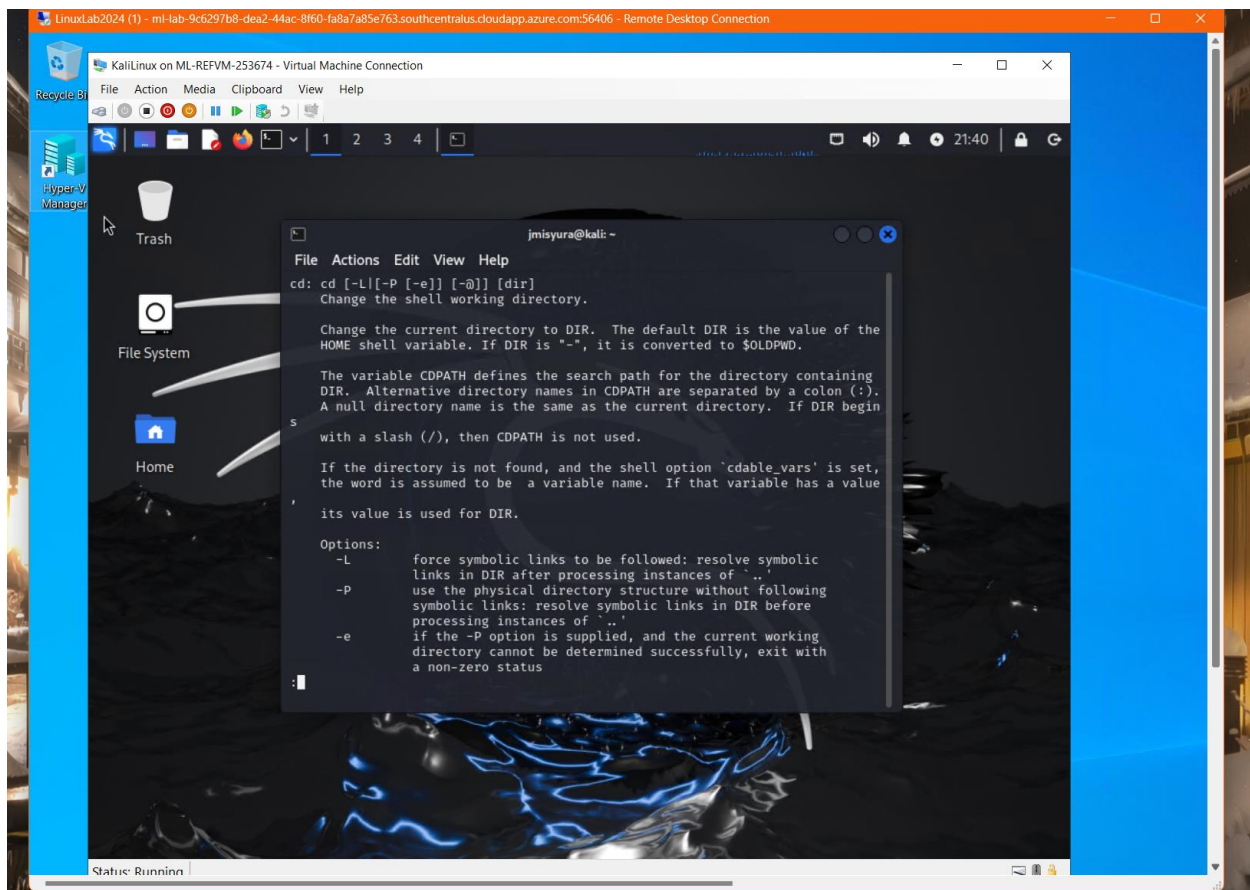

The screenshot of the manual page with that contains information about the syntax:

The screenshot of the command to access help page for the cd command:

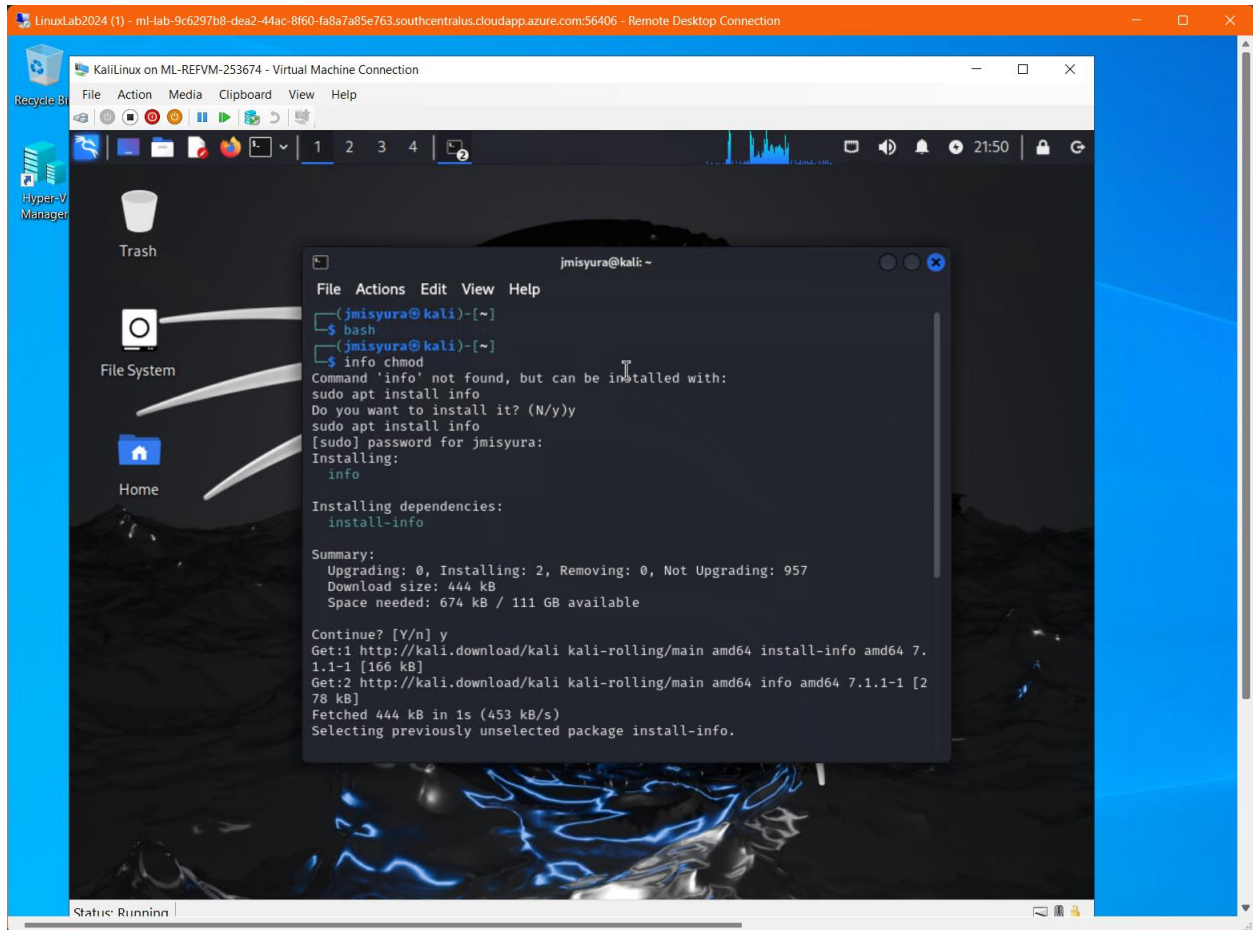

The screenshot of the output of that help command:

A screenshot of the manual information for math.h, be it a manual page result or a web page:

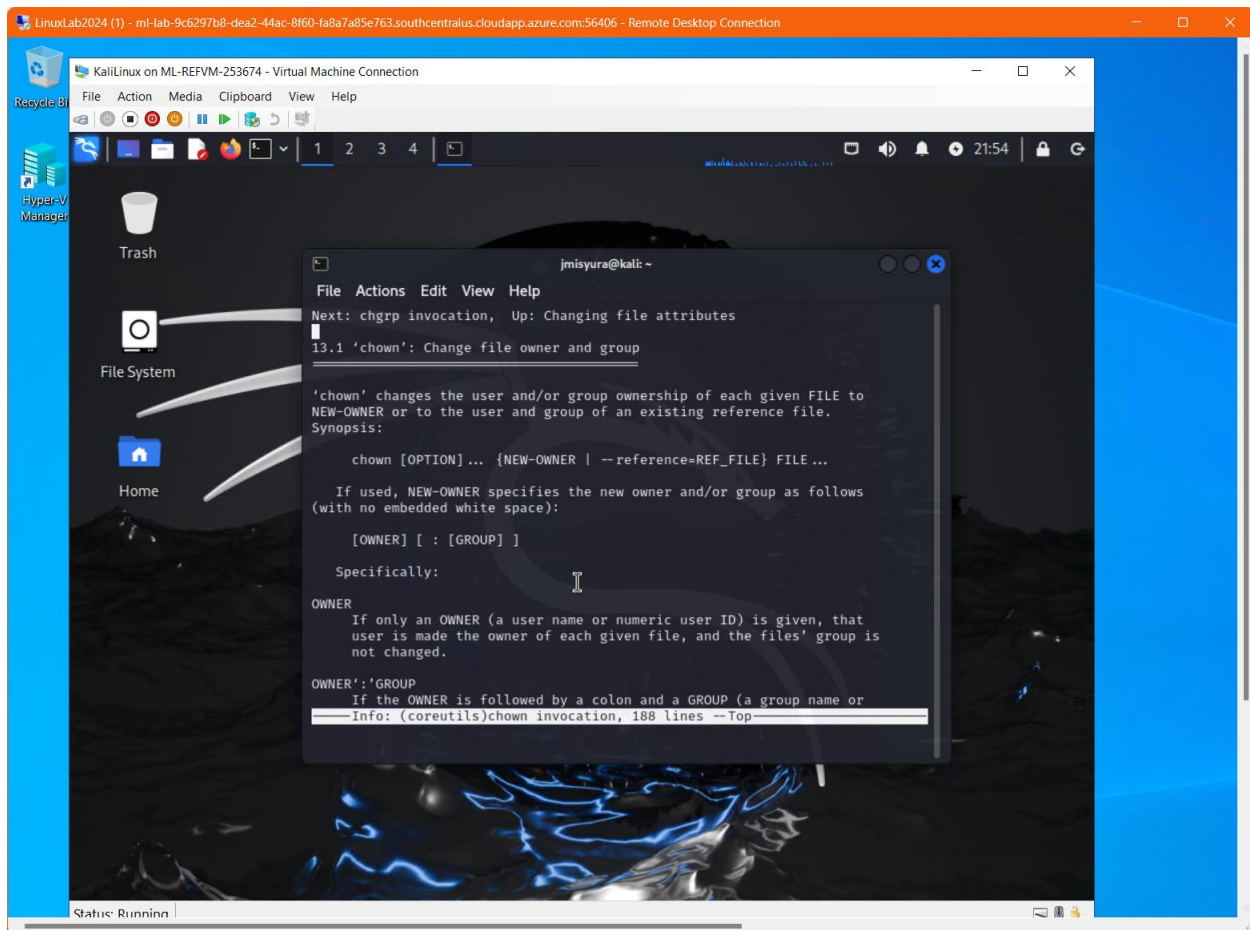

The command to get the info page for chown, but starting with chmod:

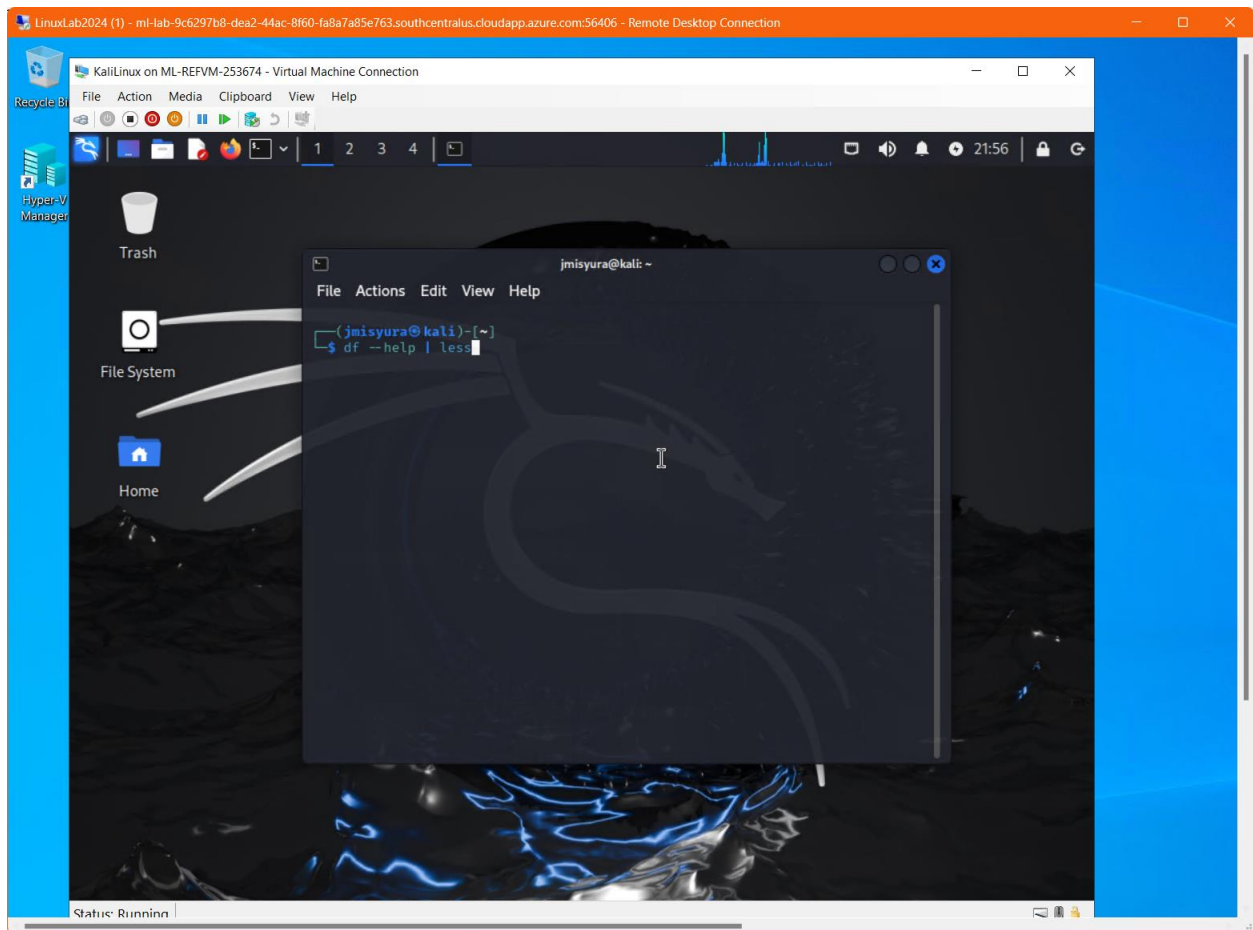

The screenshot shows a remote desktop connection to a Kali Linux virtual machine. The desktop environment includes icons for Recycle Bin, Hyper-V Manager, File System, and Home. A terminal window is open, displaying the following commands and output:

```
jmisura@kali: ~  
File Actions Edit View Help  
(jmisura@kali)-[~]  
$ bash  
(jmisura@kali)-[~]  
$ info chmod  
Command 'info' not found, but can be installed with:  
sudo apt install info  
Do you want to install it? (N/y)y  
sudo apt install info  
[sudo] password for jmisura:  
Installing:  
info  
  
Installing dependencies:  
install-info
